Physical Buttons

a Headphone jack

b Mini USB port

c Volume Rocker

Press – raises volume of music (if music is playing), raises volume of call (if on a call), raises ringer if not listening to music or on a call

Press and hold – raises more quickly, all the way down to mute

d Lock

Press – locks the phone

Press and hold – if the phone is unlocked, activates the voice command feature; if the phone is locked, unlocks the phone

e Camera

Press – brings up the camera

Press and hold – brings up photo gallery
If the camera is open, press to take the picture

f Back Button

Press – takes the user back one screen

Press and hold – returns the user to the phone home screen

g Phone Button

Press – opens recent calls list

Press and hold – opens contacts list (or perhaps 'Communications' home screen-contacts, text messages, share statuses etc.)

If on a call, press to toggle between active call screen and any other screen the user may navigate to while on a call

h Music Button

Press – if playing music, opens the music player screen. If not playing music, opens muve music home screen.

Press and hold – opens the muve music home screen

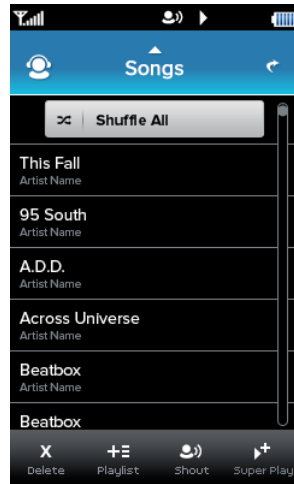

If playing music, press to toggle between now playing screen and any other screen the user may navigate to while playing music

i Power

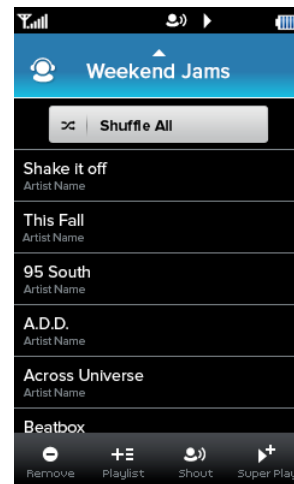

Press – End call or close application

Press and hold – Power on/off

My Music 2: Playlist Flow

My Music 3: Search

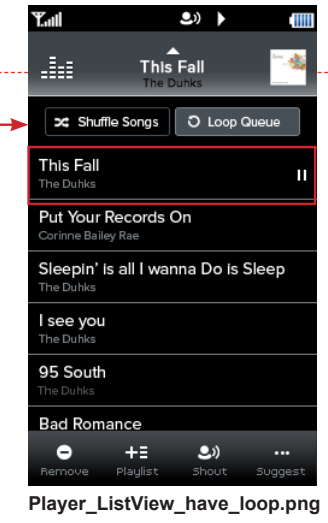

Music Player

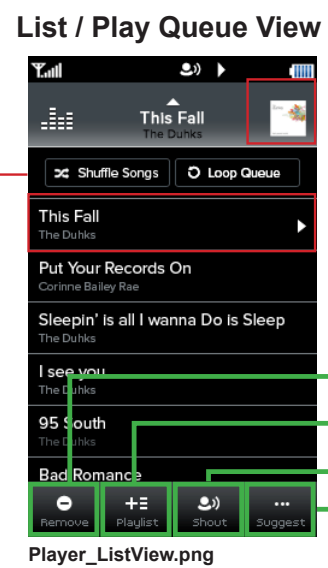

Notes on Queue Management:

A) Single tap on a song will always clear the user's play queue and start playing that song. It will load all of the items in the view from My Music (examples: all songs, playlist, album etc.) If it is the last song on that album or playlist, it will play the song and then stop unless the user selects 'Loop'.

B) If the user selects the Super Play action button, then they will be prompted with the different choices for play order and will be able to add multiple items to their play queue.

Breadcrumbs

The breadcrumbs in Help will list the Help topic, not "Screen 1 or 5", for instance. Tapping the breadcrumb item will take the user to the first screen in that Help topic.

Help_Download_1.png

Help_Breadcrumbs.png

Rules:

1. Each item from Help home is composed of one or more screens.
2. Tapping the "Next" button takes the user to next screen. "Next" becomes "Done" on the last screen. Tapping "Done" will take the user back to the Help home screen.
3. Tapping the "Back" button takes the user back to the previous screen. Tapping 'Cancel' on the first screen to go back to the Help home screen.
4. There is no audio.

MyMusic_AllTracks_ScrollBar.png

Alphabetically ordered lists also have the letter overlay feature.

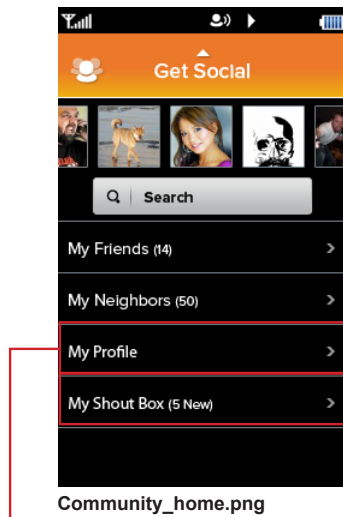

For long lists in Get Music, Get Social and My DJ, after 50 rows are listed the “show more” button will appear. When the user touches “show more” another set of up to 50 rows appends to the list.

After 100 rows are listed, the scrollbar will appear.

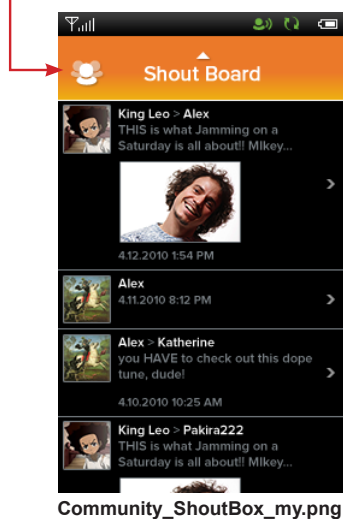

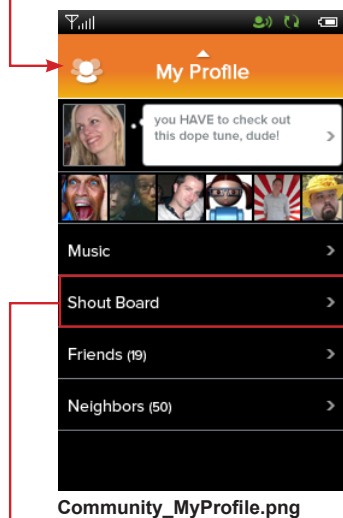

Shout Board and Shout Box

Note: We are not displaying replies to shouts any differently than we display original shouts - no threading.

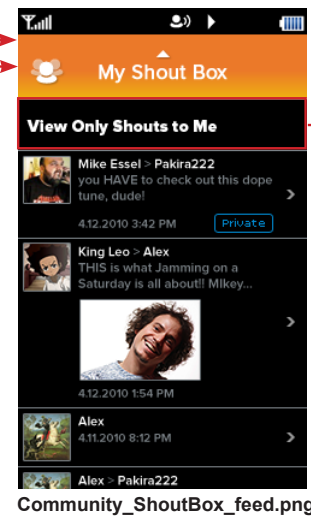

If 0 new shouts, don't show (#)

“Shout Board” displays:

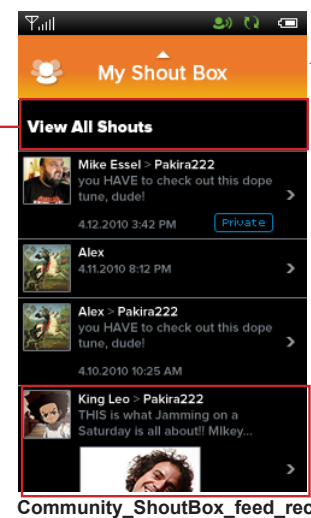

1. Shouts the user has received directly from another user, Public only
2. Shouts the user has sent directly to other users, Public only
3. Shouts the user has sent to the Shout Board

Once “My Shout Box” screen has been viewed, new shouts are considered “read” and not in new count

“My Shout Box” is only viewed by the user on his/her own phone. In the default view, the user sees “All Shouts”:

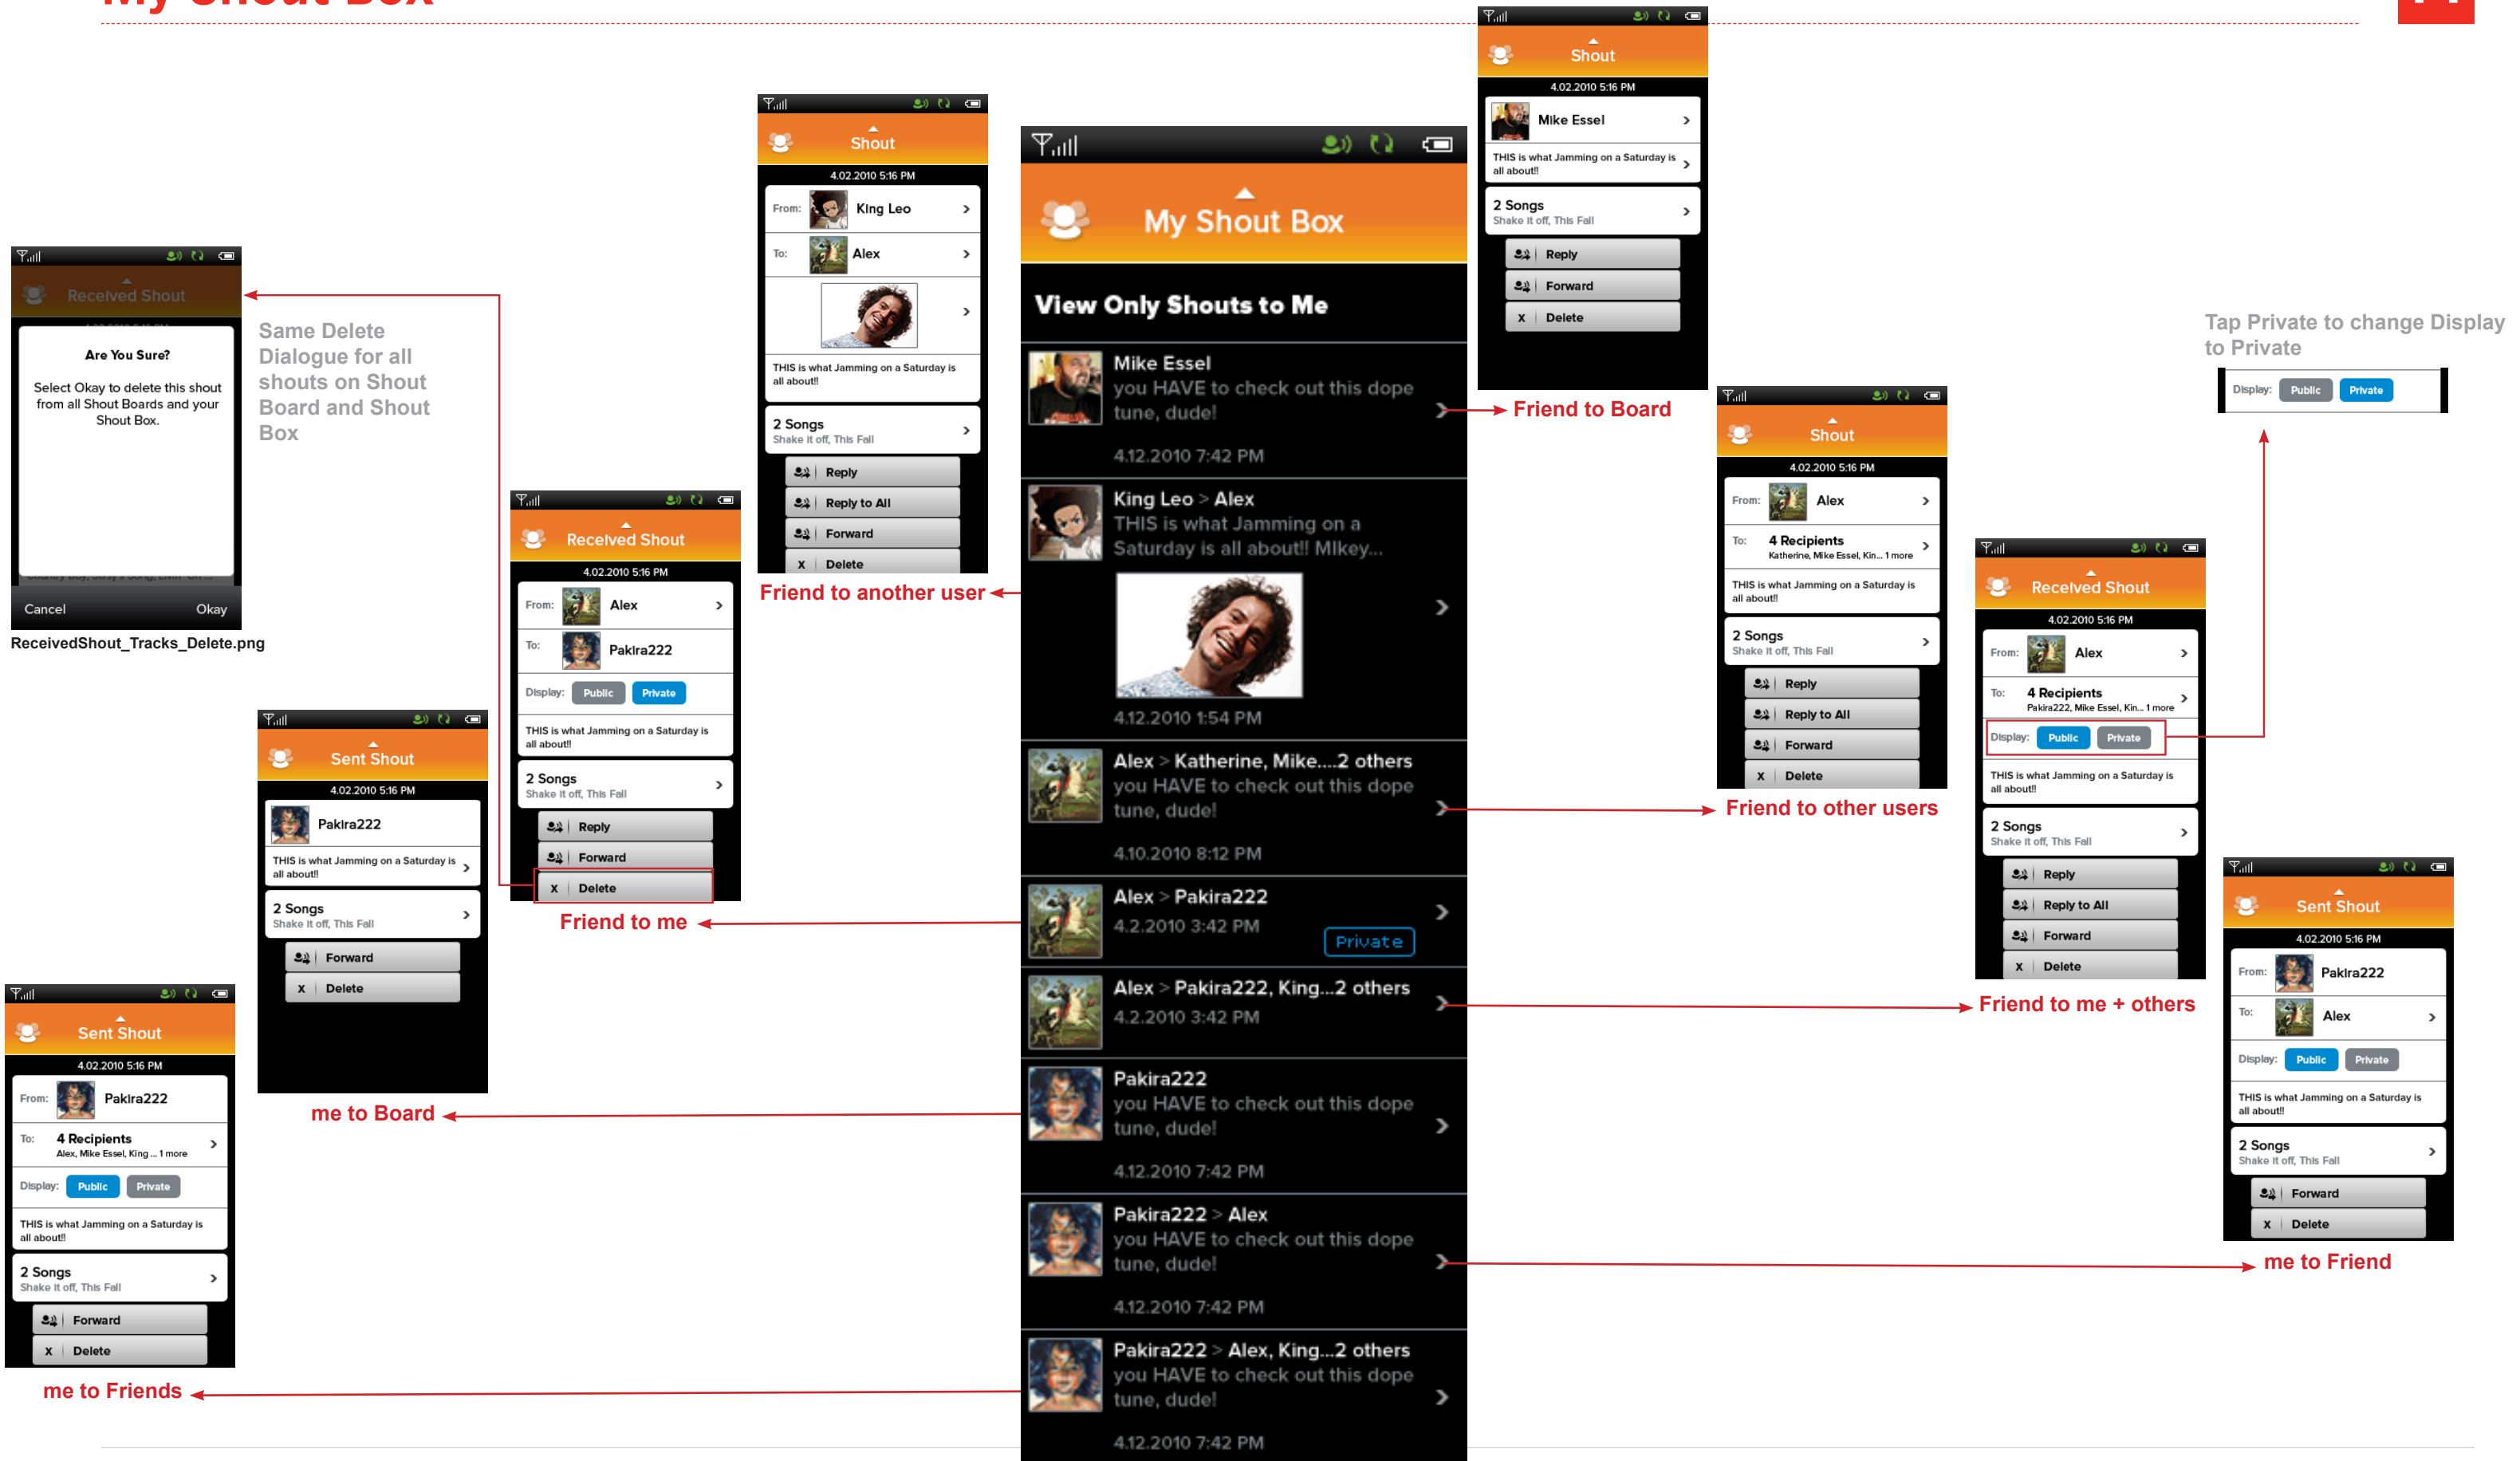

1. Shouts the user has received directly from another user, both Public and Private
2. Shouts the user has sent directly to other users, both Public and Private
3. Shouts the user has sent to the Shout Board
4. Shouts the user’s friends have sent to the Shout Board

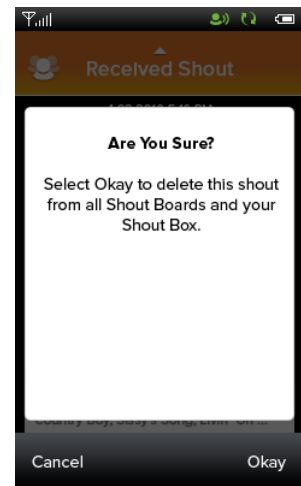

When user taps “View Only Shouts to Me”, the user only sees:

1. Shouts the user has received directly from another user, both Public and Private
